

Citizen Vendor Style Guide

for DCIT Point of Sale

Citizen has created their vendor style numbers in such a way that each variation of a particular design is accounted for, so there is no need to customize your numbers with metal colors, gemstones, sizes, or other information. Please use the attached pdf as a guide to better understand Citizen's style numbers and how correct entry helps you and your sales representative better identify the items that you're selling.

In addition, Citizen does offer a digital catalog with their correct style numbers and images. Only images can be imported into DCIT.

The correct style number for Citizen is entered in the Model field: BL5600-53E

Examples of incorrectly entered style numbers include: BL5600-53E-GEN-E, BL5600, BL5600-53E-GEN

DCIT will auto populate any SKU that has been received before – be careful of using this as you begin to correct any previously bad entries.

Citizen does not use serial numbers.

DCIT recommends checking the "SKU Per Item" box for Gabriel with serial numbers and typing the serial number as a "Manual SKU" instead of "auto".

DCIT also gives you the ability to receive your inventory as a csv file, please contact them directly for more information. Citizen does not provide these files.
