

Forevermark Vendor Style Guide

for DCIT Point of Sale

Forevermark has created their vendor style numbers in such a way that each variation of a particular design is accounted for, so there is no need to customize your numbers with metal colors, gemstones, sizes, or other information. Please see the attached guide for reading Forevermark style numbers.

The correct style number for Forevermark is entered in the Design # field: FR1002RD025D2Y0650

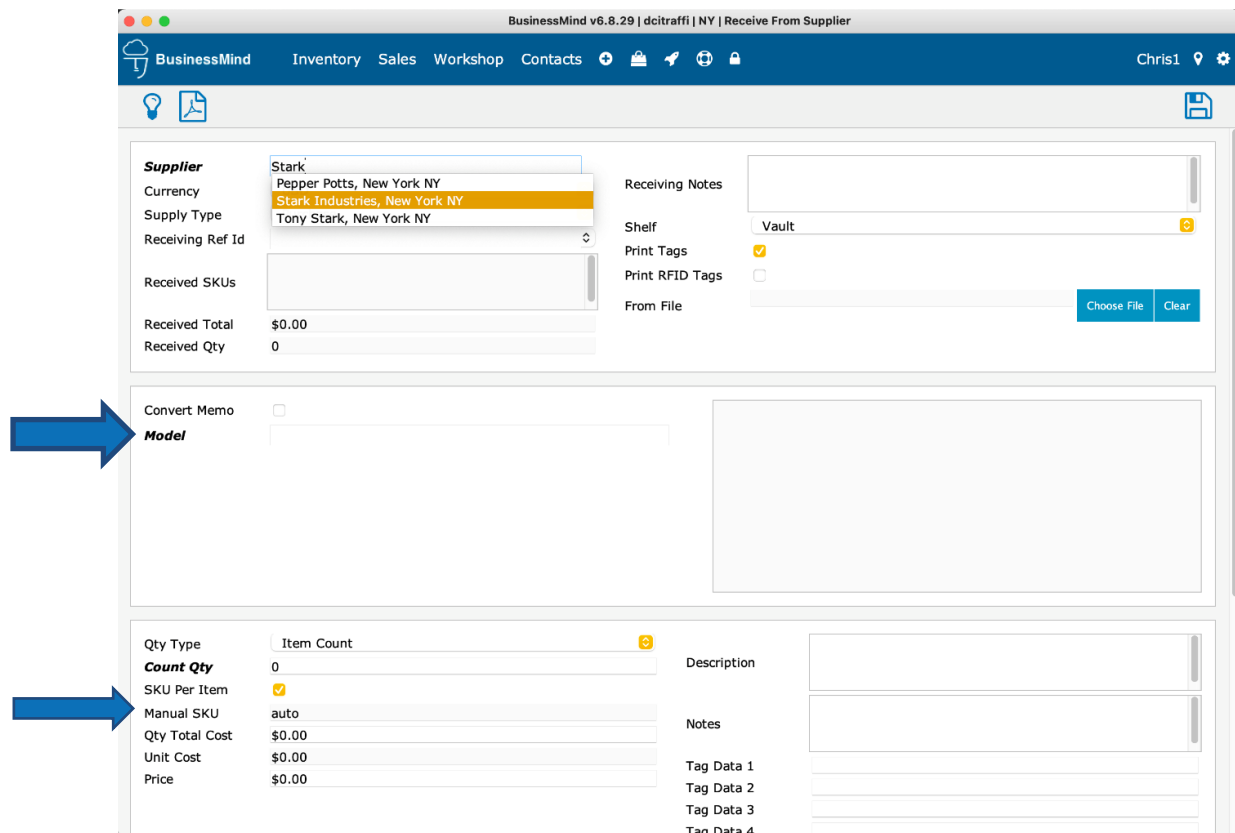

Examples of incorrectly entered style numbers include: FR1002RD025, FR1002RD025D, FR-1002RD

Enter Forevermark FMPC (serial numbers) in the Serial # field. It is advised to make this a required field.

DCIT will auto populate any SKU that has been received before – be careful of using this as you begin to correct any previously bad entries.

DCIT recommends checking the “SKU Per Item” box for Forevermark items with FMPC (serial numbers) and typing the FMPC number, as a “Manual SKU” instead of “auto”. It is advised to make this a required field.

DCIT also gives you the ability to receive your inventory as a csv file, please contact them directly for more information.

* As of 12/15/21: DCIT has an 80-character limit for entering vendor style numbers and serial numbers.
