

Forevermark Vendor Style Guide

for Edge Point of Sale

Forevermark has created their vendor style numbers in such a way that each variation of a particular design is accounted for, so there is no need to customize your numbers with metal colors, gemstones, sizes, or other information. Please see the attached guide for reading Forevermark style numbers.

The correct style number for Forevermark is entered in the Design # field: FR1002RD025D2Y0650

Examples of incorrectly entered style numbers include: FR1002RD025, FR1002RD025D, FR-1002RD

Edge will auto populate any SKU that has been received before – be careful of using this as you begin to correct any previously bad entries.

Enter Forevermark FMPC (serial numbers) in a Serial # field that is created by you in the category set-up. It is advised to make this a required field.

The screenshot displays the 'Item #001-140-00002(?)' setup form in the Edge Point of Sale software. The form is divided into several sections: Vendor Info, Inventory, Pricing, and On Sale. The 'Ven Style #' field is located in the Vendor Info section, and the 'Serial #' field is located in the (1) Ring Details section. Two blue arrows point to these fields, indicating where to enter the Forevermark style and serial numbers. The 'Serial #' field is currently empty, while the 'Ven Style #' field contains 'FR1002RD025D2Y0650'. The 'On Sale' section includes fields for Price, Margin, Starts, Ends, and Sign. The 'Description' field at the bottom is also empty.
