True Romance Vendor Style Guide
for DCIT Point of Sale

True Romance has created their vendor style numbers in such a way that each variation of a particular design is accounted for, so there is no need to customize your numbers with metal colors, gemstones, sizes, or other information.
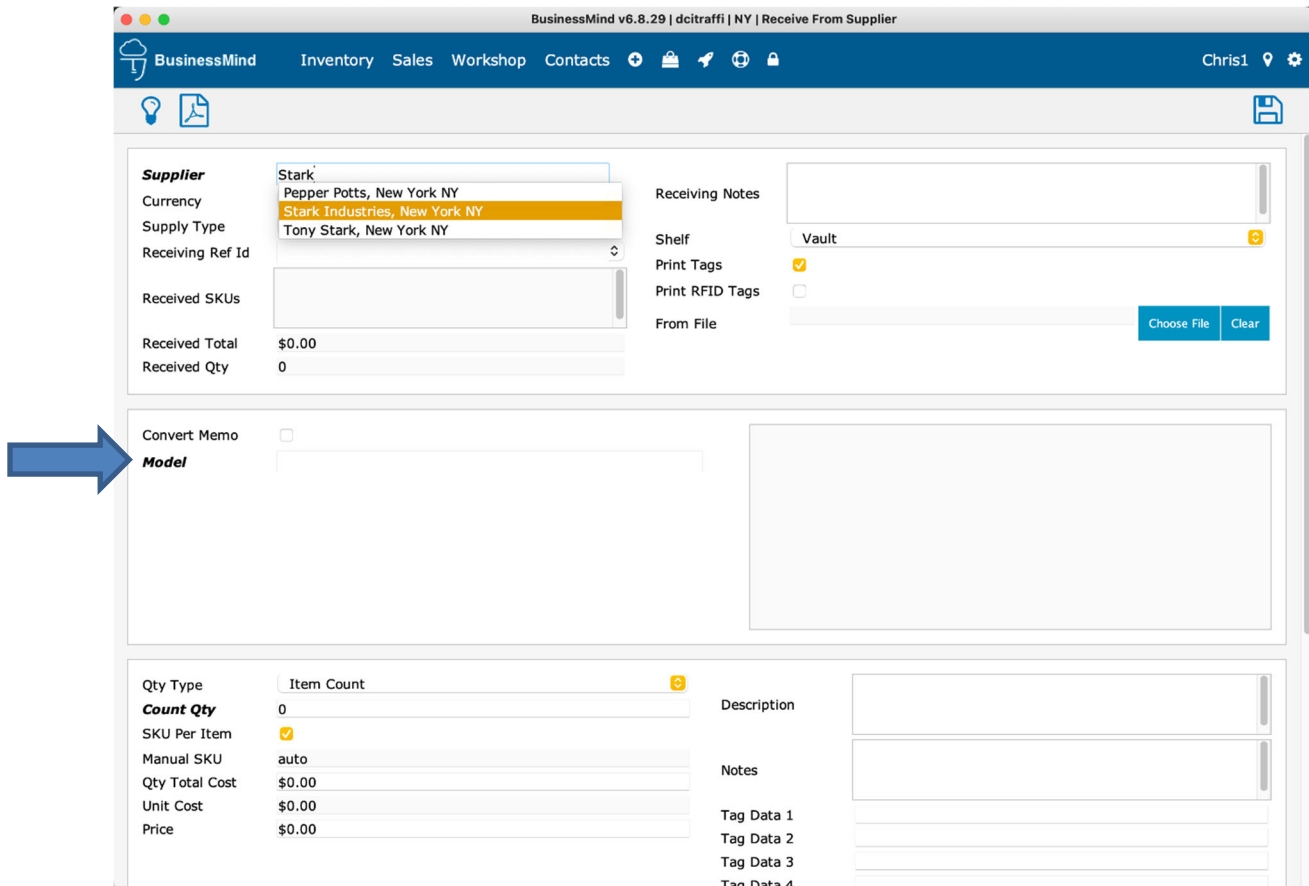

The correct style number for True Romance is entered in the Model field: WR977E/E14WG

Examples of incorrectly entered style numbers include: WR977, WR977/E, WR977/E-E 14WG

DCIT will auto populate any SKU that has been received before – be careful of using this as you begin to correct any previously bad entries.

True Romance does not use serial numbers.

DCIT also gives you the ability to receive your inventory as a csv file, please contact them directly for more information. True Romance does not provide these files.

* As of 12/15/21: DCIT has an 80-character limit for entering vendor style numbers and serial numbers.
