BIG POS Guide Michael M. - DCIT

Michael M. has created their vendor style numbers in such a way that each variation of a particular design is accounted for, so there is no need to customize your numbers with metal colors, gemstones, sizes, or other information.
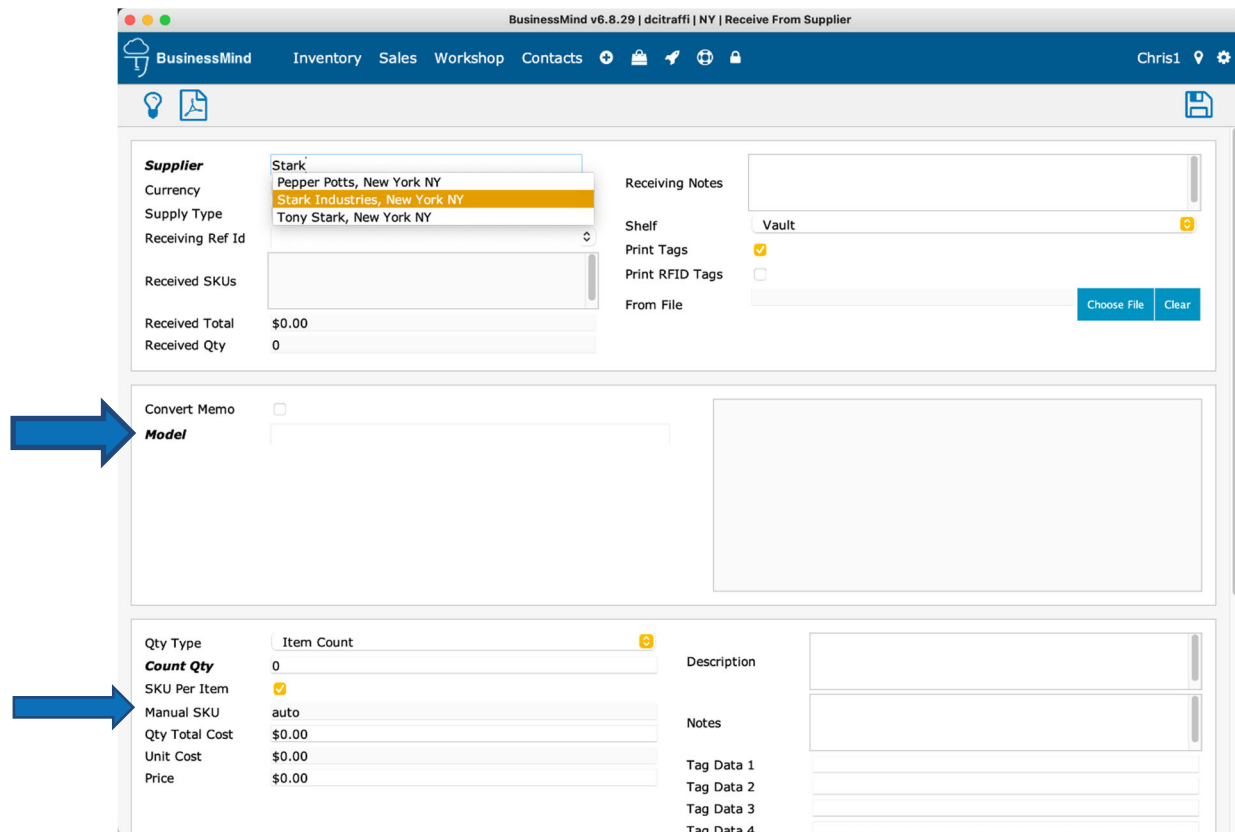

The correct style number for **Michael M.** is entered in the Model # field: **R123-1**

Examples of incorrectly entered style numbers include: **R1231, R123/1, R123-1CT, R123**

DCIT will auto populate any SKU that has been received before – be careful of using this as you begin to correct any previously bad entries.

DCIT recommends checking the "SKU Per Item" box for **Michael M**. items with serial numbers and typing the serial number, as a "Manual SKU" instead of "auto". It is advised to make this a required field.

DCIT also gives you the ability to receive your inventory as a csv file, please contact them directly for more information.

* As of 12/15/21: DCIT has an 80-character limit for entering vendor style numbers and serial numbers.
