

BIG POS Guide Tacori - Edge

Tacori has created their vendor style numbers in such a way that each variation of a particular design is accounted for, so there is no need to customize your numbers with metal colors, gemstones, sizes, or other information. Please see the attached guide for reading Tacori's numbers.

The correct style number for Tacori is entered in the Style # field: HT 2517 B 1/2X W

Examples of incorrectly entered style numbers: HT 2517, HT 2517 B, HT 2517-B

Edge will auto populate any SKU that has been received before – be careful of using this as you begin to correct any previously bad entries.

Enter Tacori serial numbers in a Serial # field that is created by you in the category set-up. It is advised to make this a required field.

The screenshot displays the 'Item #001-140-00002(?)' setup screen in the BIG POS system. The category is '140 Diamond Semi-Mount Rings'. The interface is divided into several sections: 'Vendor Info' (with fields for Vendor ID, PO #, Invoice #, Quantity, Ven Style #, Style Note, Barcode, and Stock Type), 'Inventory' (with fields for Location, Status, As Of, Date Entered, Entered By, and Price Meth), 'Pricing' (with fields for Cost, Re-Cost, Re-Cost Dt, MARGIN, Retail, Lowest, Current, Sold, and Split), and 'Ring Details' (with fields for Style, Metal, Color, Finish, Ring Size, and Serial #). Two blue arrows point to the 'Style #' and 'Serial #' fields in the Ring Details section. The 'On Sale' section includes Price, Margin, Starts, Ends, and Sign fields. The 'Description' field is at the bottom with a 'Suggest' button. A 'Copy Item Details' button is located at the bottom left of the form.
