

BIG POS Guide Yourline - DCIT

Yourline uses a simple system of identifying their style codes.

The correct style number for Yourline is entered in the Model # field: #R9997

Examples of incorrectly entered style numbers include: R9997, R-9997, #R-9997

DCIT will auto populate any SKU that has been received before – be careful of using this as you begin to correct any previously bad entries.

DCIT recommends checking the "SKU Per Item" box for Yourline Item Numbers and typing the item number, as a "Manual SKU" instead of "auto". It is advised to make this a required field.

DCIT also gives you the ability to receive your inventory as a csv file, please contact them directly for more information.
