

BIG POS Guide Yourline - Edge

Yourline uses a simple system of identifying their style codes.

The correct style code for Yourline is entered in the Design # field: #R9997

Examples of incorrectly entered style numbers: R9997, R-9997, #R-9997

Edge will auto populate any SKU that has been received before – be careful of using this as you begin to correct any previously bad entries.

Enter Yourline Item Numbers in a Serial # field that is created by you in the category set-up. It is advised to make this a required field.
