

# Vlora Vendor Style Guide

## for Edge Point of Sale

Vlora has created their vendor style numbers in such a way that each variation of a particular design is accounted for, so there is no need to customize your numbers with metal colors, gemstones, sizes, or other information.

Please see below a reference key for help in reading Vlora’s style numbers.

V is for Vlora

R, BB, B, ER, P, N is for the product category

YG, WG, RG are for metal color.

The correct style category for Vlora is entered in the Vendor Style # field: VR60001/YG

Examples of incorrectly entered style numbers include: VR60001, VR60001, VR60001YG, VR60001/YG/6

Vlora does not use serial numbers.

Edge will auto populate any SKU that has been received before – be careful of using this as you begin to correct any previously bad entries.

In Edge, if you wish to account for an item that is custom made for a customer, you can use the “Style Note” field for this information, maintaining the integrity of the style number on your invoice. If the item is a special order, you will use the “Stock Type” field to record that and allocate the item to the customer.
