

## **BIG POS Guide GN Diamond - DCIT**

**GN Diamond** has created their vendor style numbers in such a way that each variation of a particular design is accounted for, so there is no need to customize your numbers with metal colors, gemstones, sizes, or other information.

The correct style number for **GN Diamond** is entered in the Model # field: **D59620-04A** 

Examples of incorrectly entered style numbers include: **D59620/04A**, **D5962004A**, **D59620 04A**, **D59620** 

DCIT will auto populate any SKU that has been received before – be careful of using this as you begin to correct any previously bad entries.

DCIT recommends checking the "SKU Per Item" box for **GN Diamond** items with stock numbers and typing the stock number, as a "Manual SKU" instead of "auto". It is advised to make this a required field.

DCIT also gives you the ability to receive your inventory as a csv file, please contact them directly for more information.
