

# BIG POS Guide Vlora - Lightspeed

**Vlora** has created their vendor style numbers in such a way that each variation of a particular design is accounted for, so there is no need to customize your numbers with metal colors, gemstones, sizes, or other information.

Please see below a reference key for help in reading **Vlora's** style numbers.

V is for Vlora

R, BB, B, ER, P, N is for the product category.

YG, WG, RG are for metal color.

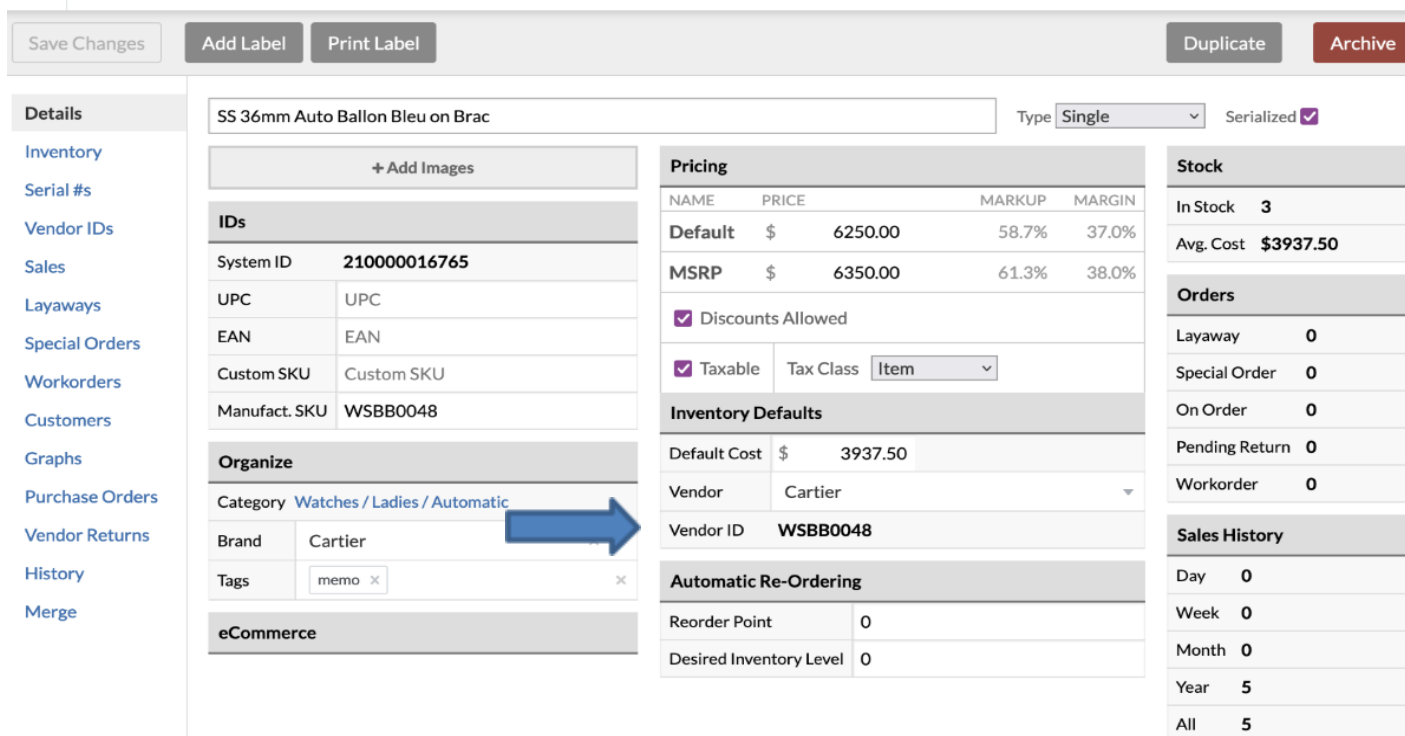

The correct style number for **Vlora** is entered in the Vendor Style # field: **VR60001/YG**

Examples of incorrectly entered style numbers include: **VR60001, VR60001, VR60001YG, VR60001/YG/6**

**Vlora** does not use serial numbers.

Lightspeed will auto populate any SKU that has been received before – be careful of using this as you begin to correct any previously bad entries.

Lightspeed also gives you the ability to receive your inventory as a CSV file, please contact them directly for more information.
