

BIG POS Guide Yourline - Lightspeed

Yourline uses a simple system of identifying their style codes.

The correct style number for **Yourline** is entered in the Vendor ID field: #R9997

Examples of incorrectly entered style numbers include: R9997, R-9997, #R-9997

Lightspeed will auto populate any SKU that has been received before – be careful of using this as you begin to correct any previously bad entries.

Lightspeed recommends checking the “Serialized” box for **Yourline** items with serial numbers and typing the serial number under the Serial #'s field. It is advised to make this a required field.

Lightspeed also gives you the ability to receive your inventory as a CSV file, please contact them directly for more information.
