**Revelation** has created their vendor style numbers in such a way that each variation of a particular design is accounted for, so there is no need to customize your numbers with metal colors, gemstones, sizes, or other information.

The correct style number for Revelation is entered in the Vendor Model field: LBF04283-4W-IC

Please see below for help in reading Revelation's style numbers: LBF04283-4W-IC

LBF04283-4W-IC: this defined by three parts as follows:

- 1. LBF04283 is the parent style#,
- 4W 4 means 14KT, W means White gold, we generally offering everything in 14KT except special orders, so mostly it has 4, but if it has 8 then that stands for 18KT, if it has PT that means platinum, then the second letter is self-explanatory – W or Y for Yellow and P for Pink/Rose gold.
- **3.** IC: stands for the customer type, we have IC and RC, IC means independent customers of US, RC stands for independent customers of Canada.

Examples of incorrectly entered style numbers: LBF04283, LBF04283/4W; LBF042, LBF04283/4W/IC, LBF04283-4, LBF04283-IC size 7.5, LBF04283 (CUSTOMER NAME)

Enter **Revelation's** serial numbers into one of 15 variation fields available in the Jewelmate software. It is advised to make this a required field.
