

BIG POS Guide DV Jewelry - DCIT

DV Jewelry has created their vendor style numbers in such a way that each variation of a particular design is accounted for, so there is no need to customize your numbers with metal colors, gemstones, sizes, or other information. Please see the attached guide for reading **DV Jewelry's** style numbers.

The correct style number for **DV Jewelry** is entered in the Model # field: 71049120

Examples of incorrectly entered style numbers include: S/O 71049120, 71049120 yellow, 71049102 size 10

DCIT will auto populate any SKU that has been received before - be careful of using this as you begin to correct any previously bad entries.

DCIT recommends checking the "SKU Per Item" box for DV Jewelry items with serial numbers and typing the serial number, as a "Manual SKU" instead of "auto". It is advised to make this a required field.
