

BIG POS Guide Apex Diamonds - DCIT

Apex Diamonds has created their vendor style numbers in such a way that each variation of a particular design is accounted for, so there is no need to customize your numbers with metal colors, gemstones, sizes, or other information.

The correct style (model #) number for **Apex Diamonds** is entered in the Model # field: 10-00507, R784Y-01

Examples of incorrectly entered style numbers include: 1000507, S/O 10-00507, R784Y01, R784Y-Smith, R784Y-01 size 4.5

DCIT will auto populate any SKU that has been received before – be careful of using this as you begin to correct any previously bad entries.

DCIT recommends checking the “SKU Per Item” box for **Apex Diamonds** items with serial numbers (SKU numbers) and typing the serial number, as a “Manual SKU” instead of “auto”. It is advised to make this a required field.
