

BTB Insider – Managing Partner Permissions Just Got Easier

We've made two small but impactful updates to Balance to Buy that make managing Partner Permissions even easier:

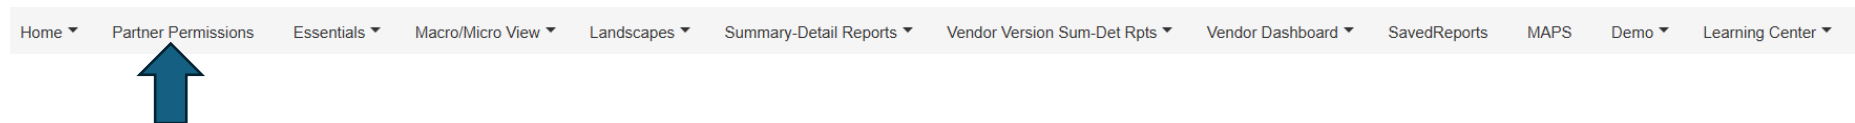

Quick Access from Summary Detail Reports

You can now left click within any Summary Detail Report to drill directly into the Partner Permissions page where you can request and manage data sharing with your vendor partners.

New Toolbar Shortcut

We've also added the Partner Permissions link to the toolbar, making it easier to find and access at any time.

Turning on Partner Permissions and sharing data with your vendors is key to a successful collaboration and partnership. It allows vendors to see your data, specific to them, so they can better understand inventory, sell-through performance & aging. As the retailer, you have **full** control over who you choose to share data with by utilizing the Partner Permissions page.

As a reminder, vendors **only** see your sales and inventory data at cost, they do not see any sensitive information such as customer information, retail prices, or gross profit. Additionally, only sales and inventory data are pulled for data share retailers who are not Balance to Buy clients.

If you have any questions, feel free to reach out to our team. If you are a Balance to Buy client, please contact your consultant. If you are a data share retailer sharing with vendors, please reach out to Tanya Adams tanya@bigjewelers.com.
